

ADPICS ADVICE OF CHANGE

ADPICS users creating an Advice of Change should remember that the Interface Type field is now blanked out on the changed ("CINP") version of the ADPICS 2360 Direct Purchase Order Writing screen, and ADPICS 2100 Requisition Header Entry screen. There is not an edit in place to prompt the user to fill in the Interface Type field if changes have been made to the detail screen only. Users must remember to enter the correct Interface Type before posting the document.
